Data as of 30/06/2026

Pharma Stocks Delivered Strong Alpha

Pharma stocks did well given bottoming of price erosion, a weaker rupee and exemption on tariffs as well as a growing opportunity from patent expiry and India's infrastructure, expertise and scale in the industry. This benefitted Aurobindo and Granules.

Shriram Benefitted from Multiple Tailwinds

Cheaper valuations, attractive margins and a stake taken by MUFG, which will provide capital, supported Shriram's performance.

Tata Steel Benefitted from Commodity Upswing

A scale player in steel, Tata Steel benefited from a rising commodity price environment.

Kaveri Seed Underperformed After Stellar Run

After a strong run in 2024–2025, weaker sentiment led to underperformance despite the company's strong long-term fundamentals.

IEX Impacted by Regulatory Change

Indian Energy Exchange was hit by a regulatory change allowing for more competition, but still remains the largest player in a significant growth industry.

Redington Affected by Macro Headwinds

Redington was impacted by revenue headwinds from the Middle East and a weaker Tech sector. However, with distribution of tech brands across India, Middle East, Africa and Asia, the long-term opportunity remains exciting.

Stock selection contributed across multiple sectors, led by Information Technology (22%), Healthcare (16%) and Industrials (14%).
